

Using the Audio Guide

Follow any route on the laminated map issued with the Audio Guide

When you reach a numbered marker on the map, key in the displayed number on your audio wand to hear about the area.

Most of the trees mentioned in the guide are identified by yellow poles.

Don't forget to look at the interpretation panels if you want more information.

- (C) Aotearoa New Zealand – 20min, track class 3**
Railway and River – 45min, track class 3
- (D) Nature Trail – 20min, track class 3**
- (E) Limestone Hill – 20min, track class 3**

See Visitor Guide Map for details

Limestone Heritage Walk

Collapsed cave systems are present as depressions, one drains internally (31), through the debris filling an ancient cave system. Try telling the time at the nearby Sundial. Enroute is an example of tilting during movement of the earth's surface plates (30).

The quarry face of the Eugenana State Reserve shows the last folding and filling of ancient caves by flows of material about 350 million years ago. (32) Limestone from Eugenana was used by BHP in making steel at Newcastle NSW, including for the Sydney Harbour Bridge.

Limestone Hill has a lookout (27) a view of the flooded former BHP Quarry that the railway served may be had. A hand dug quarry and kiln ruin from the 1860 period (26), a pothole and small caves. Do not enter any caves, please be aware of cliffs.

The tramway cutting (18) dates from 1860 period and was part of a system extending to Barrington from Don. Another part of the route is now the Entry Avenue.

The riverbed under the Don River bridge is limestone (33). Turn right, walk 150m and view a limestone cliff being undercut by water (40).

Allow 10 minutes to walk between each dot point from 1 to 6 – an hours walk.

Walk down the railway formation (1916) built over the tramway route (c1860) running next to the Don River through bushland to experience the landscape from those times. (39) Local forest with river views, wildlife may be seen. Allow 45 minutes return for walking the whole railway line formation.

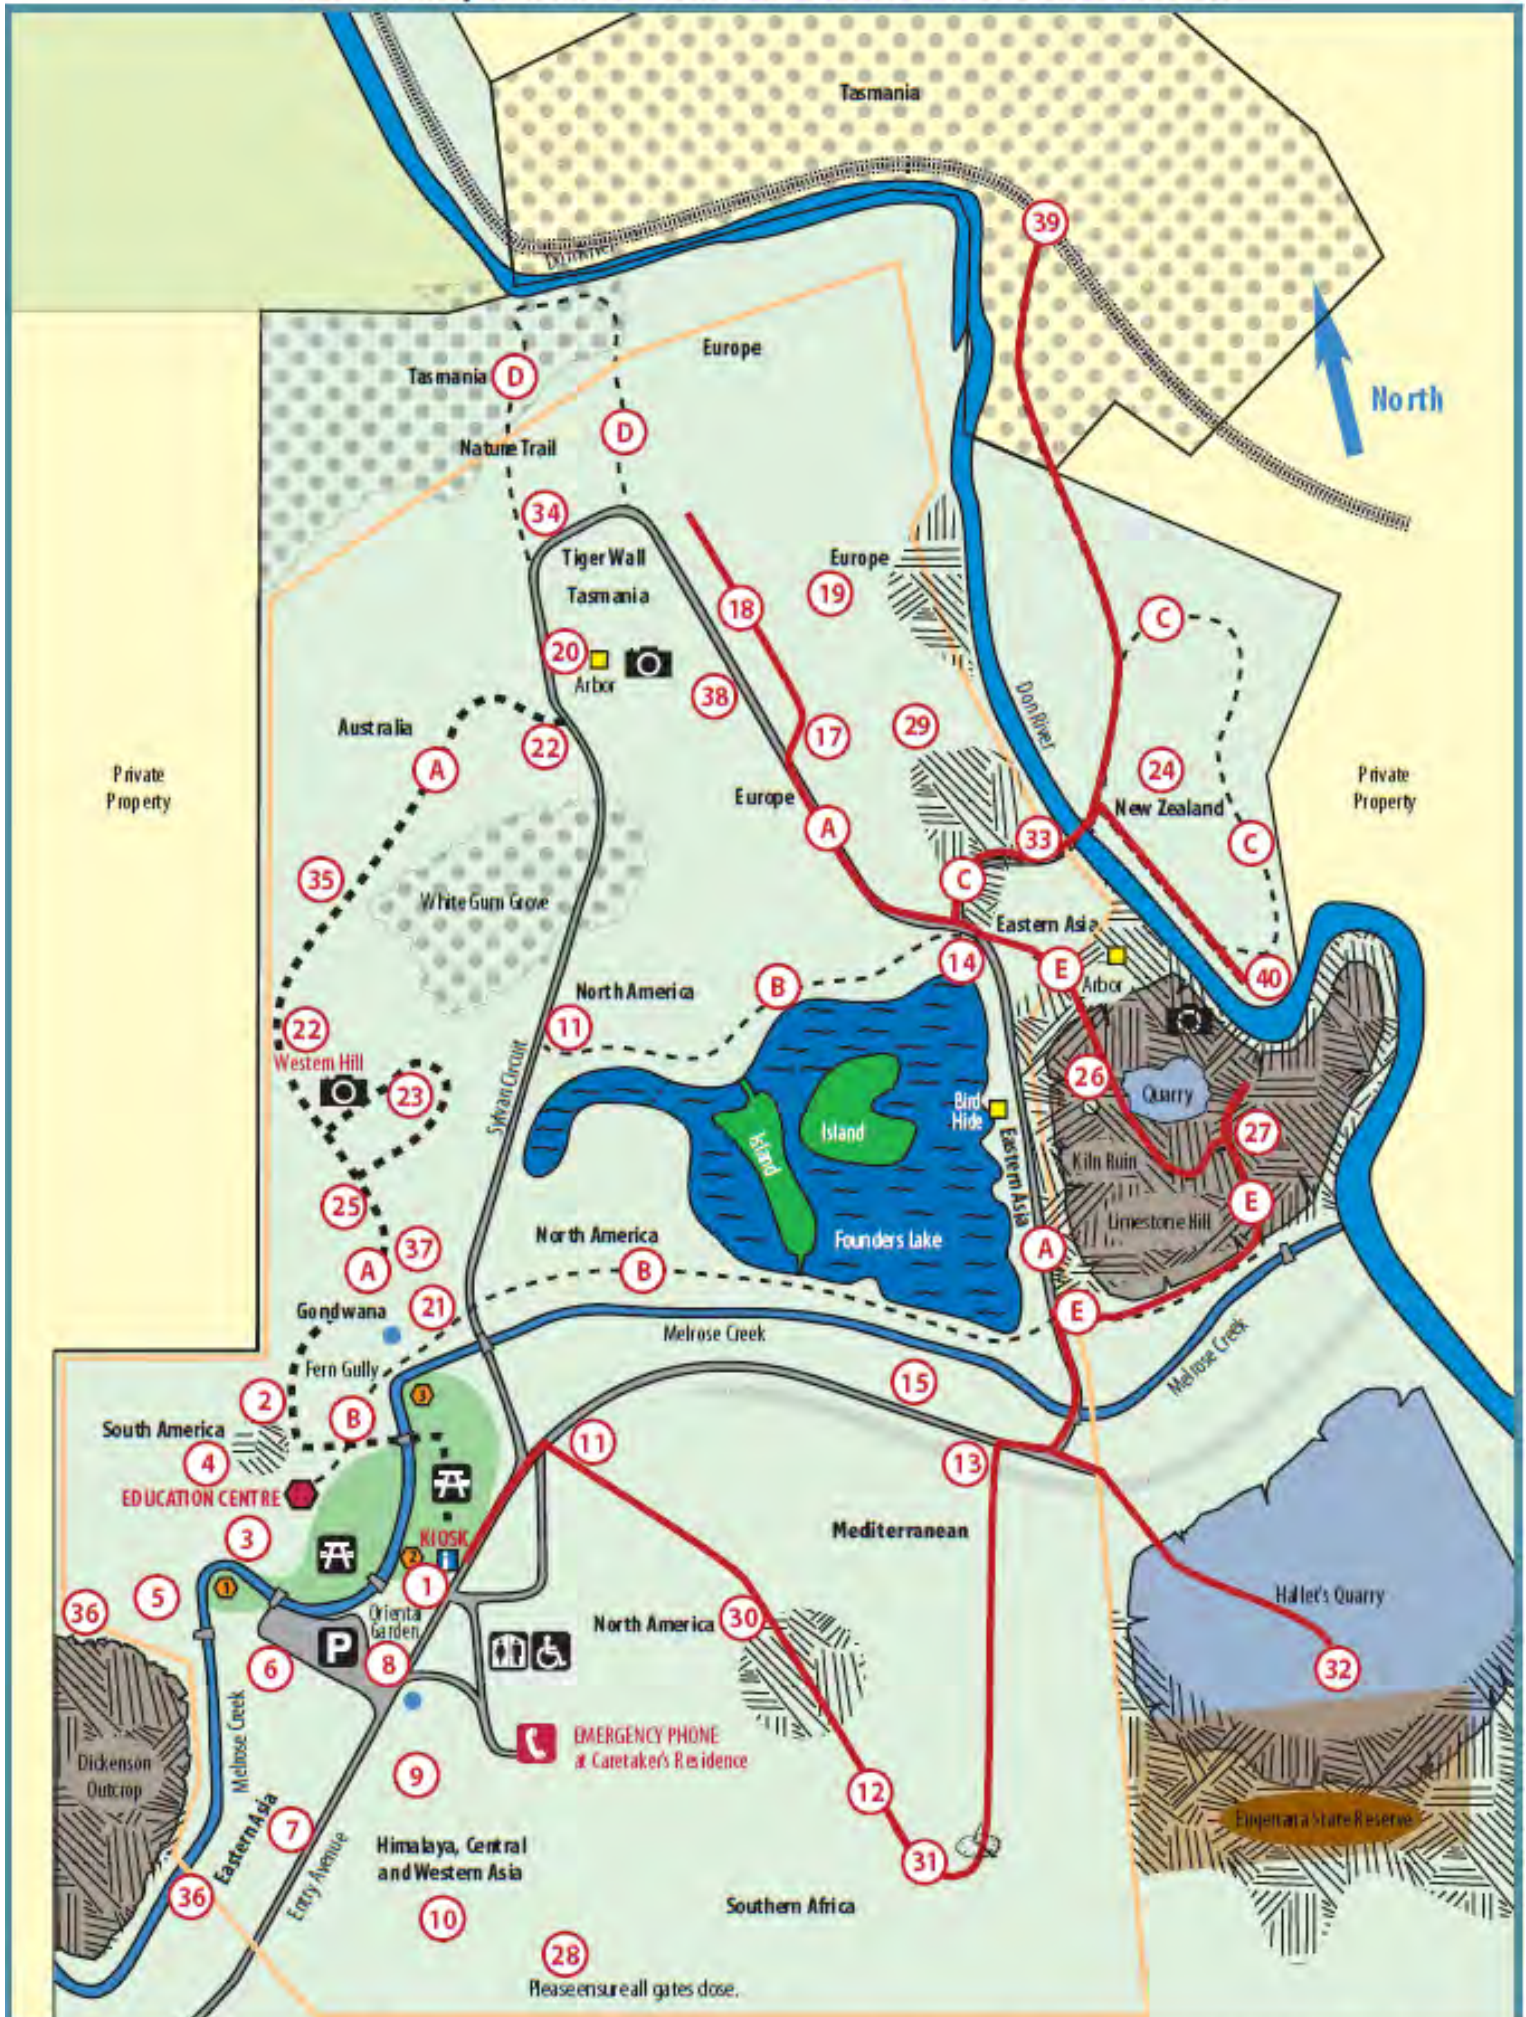

Audio Tour GUIDE MAP

This guide can be re-used,
please return it with your audio wand.

Ph: (03) 6427 2690
PO Box 370 Devonport TAS 7310
Email: tasarb@tasmanianarboretum.org.au

Note: Railway formation continues for 500 metres and ends at a fence.
